

Governance Risk Compliance Business Continuity Manager

Boards of Directors and executive management recognize the ever increasing importance of effective risk management efforts in meeting their organization's strategic objectives. Globalization, evolving business models, upgraded IT systems, the changing regulatory environment and higher stakeholder expectations serve as a critical catalyst driving this heightened need to identify and address significant risks that could prevent a company from achieving its strategic objectives.

Specialty - Business Continuity

PwC's Business Continuity Management (BCM) practice provides a broad range of assessment; design and implementation services that help an organization identify and respond to risks that can interrupt operations. Services include:

- Performing Business Impact Assessments and Risk Assessments
- Developing Recovery Strategies
- Developing Business Continuity Plans
- Developing IT Disaster Recovery Programs
- Designing Continuity Management Governance Functions
- Developing Business Continuity Policies and Procedures
- Creating Crisis Management Programs
- Testing Business Continuity and Crisis Management Plans

PwC Requirements - Manager

Knowledge Preferred:

- Demonstrates extensive knowledge of risk and business continuity management, including the identification and assessment of enterprise risks, development of business impact analysis (BIA), recovery strategies, business continuity plans, crisis management plans, plan testing and maintenance, and continuity program governance.
- Demonstrates extensive understanding of disaster recovery plan concepts and practices, with the ability to review IT disaster recovery plans and their alignment with an organization's business continuity requirements.
- Demonstrates extensive understanding of business operational processes, information technology, emergency management, logistics, customer management, and finance and accounting,
- Demonstrates extensive knowledge of understanding and/or directly managed through the common issues facing clients who provide products and services in several industry sectors.
- Demonstrates extensive knowledge of business continuity and/or risk management proposal creation and business development.
- Demonstrates direct experience as a consultant in a professional services firm or large enterprise, which includes interfacing with clients on risk management solutions, as well as leading the planning and execution of projects, in the following areas: Business Continuity, Enterprise Risk Management, and Process Improvement.

Skills Preferred:

- Demonstrates extensive abilities and/or a proven record of performing BIAs that included creating company-specific criticality and impact assessment criteria, identifying relevant BIA respondents, developed and/or deployed user questionnaires, facilitated BIA requirements working sessions, consolidated departmental BIA results, and created detail reports and executive BIA presentations.
- Demonstrates extensive abilities and/or a proven record of developing recovery strategies for critical business functions, including the following: creating an overall summary of recovery strategy options, identifying alternative risk mitigation and recovery strategies based on management's conclusions from the BIA, facilitating recovery strategy workshop sessions, assessing current business recovery capabilities, and recommending enhancements to operations and infrastructure to strengthen recovery capabilities.
- Demonstrates extensive abilities and/or a proven record of creating detail and summary departmental business continuity plans and IT Disaster Recovery plans that were validated and updated through plan testing activities, including the development of a governance program designed to keep the plans current and relevant.
- Demonstrates extensive abilities and/or a proven record of leading business continuity, IT disaster recovery, and crisis management testing activities that validated the business continuity, crisis management, and disaster recovery plans.
- Demonstrates extensive abilities to identify and address client needs: developing and sustaining extensive client relationships using networking, negotiation and persuasion skills to identify and sell service opportunities; preparing and presenting complex written and verbal materials; and defining resource requirements, project workflow, budgets, billing and collection.
- Demonstrates extensive abilities and/or a proven record of success as a team leader, including the following: leading teams to generate a vision, establish direction and motivate members, create an atmosphere of trust, leverage diverse views, coach staff, and encourage improvement and innovation.
