

## President's Address

There is so much talk about the potential benefits to Chat GPT, it got me thinking what are the risks of using Chat GPT in Resiliency Planning or Response planning? Let's be honest, you are going to be asked at some point! So here are some thoughts.

As an AI language model, Chat GPT can be a valuable tool, particularly in tasks that involve processing and generating text-based information. However, there are also potential risks that should be considered when using Chat GPT in this context:

**Bias:** AI language models like Chat GPT can perpetuate and amplify biases that exist in the data they are trained on. If the data used to train Chat GPT is biased, then its responses and recommendations may reflect and reinforce those biases. This can lead to unfair or discriminatory outcomes.

**Misinformation:** Chat GPT may generate responses that are factually inaccurate or misleading. This can be particularly problematic in the context of resiliency planning and response, where accurate information is crucial for effective decision-making.

**Lack of human oversight:** Chat GPT is an AI system that operates based on pre-programmed rules and algorithms. While it can generate text-based responses, it lacks the ability to understand the context of the situation or the emotional state of the individuals involved. Therefore, it is important to have human oversight and intervention to ensure that the responses generated by Chat GPT are appropriate and effective.

**Cybersecurity risks:** Chat GPT is an internet-connected system that can be vulnerable to cyber-attacks, such as hacking or data breaches. This can compromise the confidentiality and integrity of the data processed by Chat GPT, leading to potential security and privacy concerns.

Overall, while Chat GPT can be a valuable tool in resiliency planning and response, it is important to consider the potential risks and implement appropriate measures to mitigate them. These may include careful selection of training data, human oversight and intervention, and robust cybersecurity protocols.

Interestingly, the above article is what Chat GPT wrote for me as its own observed risks when I asked it, so what do you think? Email me your thoughts at [northtexas@acp-chapters.com](mailto:northtexas@acp-chapters.com).

**Chet Bojarski – ACP North Texas President**

## Events

### [This Month's Meeting](#)

#### [Lessons Learned to Improve Resiliency and Create a More Cyber-Resilient Organization](#)

Rob Zegarra, Director of Education

DRI International

Tuesday, April 4th

Noon - 1:30 PM

UTD Campus in Richardson

Rob is flying in from Atlanta for this Special Presentation!

Join Us In Person!

### [Other Event Opportunities](#)

#### [Comprehensive Cybersecurity Defense \(CCD\)](#)

April 17-20, 2023

Federal Reserve Bank of Dallas

[Registration Deadline: April 12, 2023](#)

[More Information on Events](#)

## Resources

### [Employment Opportunities](#)

#### **Operational Risk Manager**

Citi - Irving Campus

[Apply Now!](#)

#### **COB & CM Lead Analyst**

Citi - Irving Campus

[Apply Now!](#)

#### **Senior Customer Advocate**

Infinite Blue - Remote

[Apply Now!](#)

### [Seeking Employment](#)

Are you currently seeking employment and want to be listed in this section of next month's newsletter? Leverage the benefits of your membership and get the word out!!

[Email your name and contact information](#) (email or LinkedIn profile) to the Information and Education Director.

### [Think Tank Thursdays - Q2](#)

**Topic: "How Do You and Your Teams Add Value to Your Organization?"**

Kick Off Meeting - April 3, 2023

Discussion Meetings on Third Thursdays of the Month through June

[Sign up link \(Chapter Think Tank\)](#)

If you have questions, email [Dianne Stephens](#).

[More Information on Resources](#)

## Membership

### [Welcome our New Members](#)

Welcome the newest members to our chapter!

Victoria Broveak

Kim Cassingham

Amy Del Rose

Ahmed Jawad

Charlie Salinas

Thomas Stidham

Jennifer Tindell

### [Invite a Guest](#)

Monthly events are open to chapter members and [invited guests](#). Know someone in the industry? Invite them to a meeting and encourage them to join the chapter.

[North Texas Chapter Membership — Join Today!](#)

Reminder: The chapter offers a [Reduced Rate Program](#) to qualifying individuals who remain active with the North Texas chapter.

[More Information on Membership](#)
